PAULA CARVAJAL

Senior Software Engineer | Full-Stack | React • Node.js • TypeScript • Python • Java • PostgreSQL • AWS

New York, NY 10011 | paulaworkmi@gmail.com | (305) 464-9260 | github.com/paulacarvajal

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 6+ years of experience designing, developing, testing, deploying, and maintaining scalable web applications across the full software development lifecycle. Strong hands-on experience with **Node.js, React, JavaScript, TypeScript, RESTful APIs, PostgreSQL, MySQL, Python, Java, Docker, CI/CD, and AWS**. Experienced in translating business requirements into technical designs and production-ready solutions, developing reusable React components and backend services, optimizing database queries and application performance, and troubleshooting complex production issues. Strong background in API development, database design, automated testing, cloud-native development, code reviews, Agile/Scrum, and cross-functional collaboration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, Ruby, PHP, C#

Frontend: React.js, Next.js, Angular, AngularJS, Redux, Zustand, Context API, HTML5, CSS3, Tailwind CSS, SASS, Responsive Design

Backend: Node.js, Express.js, Ruby on Rails, Django, Flask, FastAPI, Spring Boot, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, MS SQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Jenkins, CI/CD, Git, GitHub, Linux

Testing: Jest, RSpec, MiniTest, Unit Testing, Integration Testing

Architecture & Practices: RESTful Services, API Design, System Architecture, Agile/Scrum, Code Reviews, Technical Documentation, Performance Optimization, Troubleshooting

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer — Aptask Agency / Lumen Technologies | 11/2025 – Present

- Design, develop, test, and maintain scalable enterprise web applications across frontend, backend, API, and database layers.
- Build modern full-stack solutions using React, Next.js, TypeScript, Ruby on Rails, Java, and Python.
- Develop reusable and scalable React components using TypeScript, Redux, and Zustand.
- Design and implement RESTful APIs and backend services supporting application workflows and third-party integrations.
- Implement backend services using Java/Spring Boot and Python with Flask/FastAPI, including business logic, APIs, and service integrations.
- Translate business requirements into technical implementations and collaborate with product managers and designers to deliver production-ready solutions.
- Design and maintain MySQL schemas, migrations, queries, and data-access functionality.
- Troubleshoot complex frontend, backend, API, and database issues and implement reliable fixes and enhancements.
- Use Docker and Jenkins to support development, testing, continuous integration, and deployment workflows.
- Participate in architecture discussions, technical planning, code reviews, coding standards, testing, and technical documentation.

Technologies: React, Next.js, TypeScript, Redux, Zustand, Ruby on Rails, Java, Spring Boot, Python, Flask, FastAPI, MySQL, Docker, Jenkins

Full-Stack Developer — Integrated Resources Inc. / Pfizer | 01/2024 – 11/2025

- Developed and maintained full-stack web applications across frontend, backend, API, and database layers.
- Built responsive and maintainable web interfaces using JavaScript and modern frontend development practices.
- Developed backend services and RESTful APIs using Node.js and Express.js.
- Integrated frontend applications with backend services, APIs, and data sources.
- Worked with PostgreSQL and MongoDB, including application data, queries, and integrations.
- Investigated production and development issues across the application stack and implemented durable fixes and enhancements.
- Collaborated with product managers, designers, and engineers throughout development, testing, debugging, and code review processes.

Technologies: JavaScript, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs

Web Developer / Software Developer — Freelance & Contract Projects | 12/2022 – 01/2024

- Delivered client web applications from requirements gathering through development, testing, deployment, and ongoing maintenance.

- Built responsive web applications and reusable frontend components using JavaScript, HTML, CSS, Bootstrap, and AJAX.
- Implemented backend functionality, business logic, API integrations, authentication, authorization, and validation.
- Reviewed existing codebases, diagnosed technical issues, and implemented performance and functionality improvements.
- Worked directly with clients to translate business requirements into technical solutions.

Technologies: JavaScript, HTML, CSS, Bootstrap, AJAX, Ruby, Git

Junior Web Developer — Freelance Projects | 04/2020 – 12/2022

- Developed and maintained websites and web application features for freelance clients.
- Built responsive interfaces using HTML, CSS, JavaScript, Bootstrap, and AJAX.
- Implemented backend logic using Ruby and integrated frontend applications with backend services and APIs.
- Implemented form validation, dynamic UI functionality, and API integrations.
- Investigated and resolved frontend, backend, and database-related defects.

Technologies: HTML, CSS, JavaScript, Bootstrap, AJAX, Ruby, Git

EDUCATION

Bachelor’s Degree — University of Louisville, Louisville, KY | 2012 – 2016

LANGUAGES

English — Native
